

Farmgirl Finance – the mark

Uptick — four scan brackets, same frame as ivizhin, holding a bent line taking off.

VERSION 7 · 10 SEPTEMBER 2026 · REPLACES THE "INSTANT" BOLT MARK (V6)

What changed, and why. The frame — four rounded scan brackets on a 120×120 grid — now matches ivizhin's mark exactly, so the two read as one family: same viewfinder language, different centre glyph and colour. Farmgirl Finance keeps its own green and its own symbol — an uptick, bent partway through from a shallow opening run into a sharp rise, the shape of a number actually taking off.

The mark

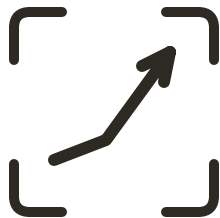

Primary – on light

Cream and white grounds. Default everywhere.

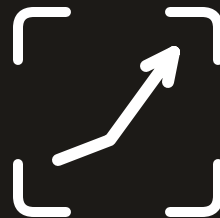

Reversed – on dark

The app sidebar. Same green accent, cream brackets.

One colour – black

Receipts, stamps, embroidery, anywhere colour won't hold.

One colour – white

Dark or unpredictable print/fabric grounds.

The lockup

Horizontal lockup – on light

Horizontal lockup – on dark

At actual size

Every place the mark is used in the app today — sidebar "Home" link, page headers, the landing nav. Nothing smaller than 20px is used; nothing needs a simplified version at these sizes.

20px – sidebar

28px – default

34px – login / signup

48px – print/social ref.

Colour

SWATCH	ROLE	VALUE	USED WHERE
	Ink, on light	#2c4c2c	Brackets and wordmark, cream/white grounds (default)
	Ink, on dark	#eef3ea	Brackets, sidebar "Home" link
	Accent	#3f8f5c	The uptick — every ground, never recoloured
	Cream	#fdf9f0	App background; reversed-ink colour on dark grounds
	One-colour black	#2c2a22	Single-ink print: receipts, stamps, embroidery

Construction

Built on a 120×120 grid, matching ivizhin's own mark exactly so the two frames are identical — only the centre glyph and accent colour tell them apart.

- **Frame:** four corner brackets, arm length 24 units, corner radius 8, stroke 5, round caps and joins.
- **Uptick:** M30 84 L56 74 L88 30 — a shallow opening run (30,84 → 56,74) bending into a sharp rise (56,74 → 88,30). Stroke 6, round caps and joins.
- **Arrowhead:** M74 37 L88 30 L85 45 — an open chevron computed to the actual angle of the final leg, not a guessed 45°.
- **Clear space:** a quarter of the mark's width, all four sides.

Type

Wordmark "Farmgirl Finance" is set in **Fredoka Bold (700)**, the same face every heading in the app uses, colour #2c4c2c on light grounds and #eef3ea on dark, tracking −0.01em.

Rules

- Never rotate the mark, and never recolour the accent beyond the values above.
- Never place the mark on a saturated or busy fill — grounds stay cream, white, dark green, or single-colour print.
- The frame is shared with ivizhin on purpose. Don't redraw it independently if either mark changes later — update both from the same brackets.

Where this lives

- `src/components/Logo.jsx` — the live React component, every in-app use
- `public/logo/farmgirl-instant-full.svg` — favicon, colour
- `public/logo/farmgirl-instant-mono-black.svg` / `-mono-white.svg` / `-reverse.svg` — the variants above, as standalone files
